SUPPLEMENT TO ERS-FOREIGN 202 --

12 YEARS OF ACHIEVEMENT UNDER PUBLIC LAW 480

ERS - FOREIGN 205
ECONOMIC RESEARCH SERVICE
U.S. DEPARTMENT OF AGRICULTURE

PREFACE

This publication is a statistical summary of shipments of U.S. farm products under programs authorized by Public Law 480, the Trade Assistance and Development Act of 1954, as amended, and under Mutual Security (AID) programs for 12 calendar years, 1955-66, and for July-December 1954, the first 6-month period after the enactment of P.L. 480 in July 1954. This supplement is designed for use with ERS-Foreign 202, 12 Years of Achievement under Public Law 480, issued November 1967.

There has been a continuous demand for a statistical review of exports under food aid programs for both fiscal and calendar years. This supplement presents by calendar years the statistical information which was included for fiscal years in the original publication.

The supplement includes an annual summary by program totals, commercial exports, and total agricultural exports, and a summary by principal commodity groups, as well as special tables for feed grains and wheat, leading dollar markets, and principal countries of destination for Government-financed exports. Exports are reported by commodity, value, and quantity for each year of the period. They are also reported by commodities grouped by individual years. The value of exports by country is shown for each year and for the period. Exports under short and medium-term credit sales programs -- the Commodity Credit Corporation (CCC) export credit sales program and Export-Import Bank loans and guarantees -- are reported by commodity and by country.

Refer to the original publication, ERS-Foreign 202, for a brief review of the evolution of P.L. 480 programs through the most recent amendment, P.L. 89-808, effective January 1, 1967. ERS-Foreign 202 summarizes and notes some of the principal achievements of the individual programs.

The legal authorizations cited for the programs are those under the Act as amended prior to the effective date (January 1, 1967) of P.L. 89-808, the 1966 amendment to P.L. 480.

A revised statistical series for Government-to-Government donations under Title II, P.L. 480, which was included in the fiscal year report, is also included for calendar years. The valuation basis is an estimated net export market value, i.e., domestic market value at port less any applicable export payment. The values previously used in the reporting of donations under this Title were full-reimbursement cost to the CCC.

The supplement was prepared under the general direction of Robert L. Tontz, Chief, Trade Statistics and Analysis Branch, Foreign Development and Trade Division, Economic Research Service. Eleanor N. DeBlois, International Economist, supervised the preparation of the report. Louise E. Stanton, Statistical Assistant, assisted in the subject matter research and preparation, including the revision of the Title II valuations.

FOOTNOTES TO TABLE 10

1/ The apparent excess of Government-financed exports over total exports may be due to lags in reporting, differences in valuation procedures, or the recording of the export as destined for the country through which transshipment was made.

2/ Net adjustment from a previous period.

3/ Less than \$500.

4/ Title II donations for Hungarian Peoples Relief are not included in donations to Hungary, but are included in the values shown for the following countries:

Country	Calendar Year			Total
	1956	1957		
Austria	457	842		1,299

Italy	---	689		689
Yugoslavia	897	50		947
Total	1,354	2,626		3,980

5/ The value shown for barter shipments to Portugal, calendar year 1959, includes wheat in the amount of \$144,000 shipped to Portugal for transshipment to the Azores.

6/ Under agreements with Burma, Iceland, Indonesia, Pakistan, and Viet-Nam, raw cotton was exported to third countries for processing. In exchange, processed goods were exported to the agreement countries. The Title I values shown for agreement countries do not include the value of the raw cotton exported to third countries as follows:

Description and Sources of Data Used for the Reporting of Exports Under Specified Government-Financed Programs, Exports Outside Specified Government-Financed Programs, and Total Agricultural Exports

The data on government programs are not obtained from the same source as total exports and are not fully comparable in regard to valuation, shipping period, etc. However, every effort has been made to provide as comparable statistics as is currently possible.

Title I, P.L. 480, Sales for foreign currency: Quantities and values are obtained from the Program Operations Division, Foreign Agricultural Service, USDA. Market values are estimated from quantities reported shipped. These estimated values are later revised to show actual values.

Title II, P.L. 480, Famine and other emergency relief: The revised statistical series for Title II donations included in this report was compiled in the Trade Statistics and Analysis Branch, Foreign Development and Trade Division, Economic Research Service, USDA, from invoices on file in the Fiscal Division, Agricultural Stabilization and Conservation Service (ASCS), USDA. Quantities are recorded by date of export and values are estimated net export prices (domestic port prices less any applicable export payments).

Title III, P.L. 480, Donations through voluntary relief agencies: For the period 1955-63, quantities were obtained from the Food Distribution Division, Agricultural Marketing Service, USDA. Export values by commodity were estimated in the Trade Statistics and Analysis Branch. Values by country were estimated in the Office of Business Economics, Department of Commerce, from unit values supplied by the Food Distribution Division. For fiscal years 1964-66, quantities and values were obtained from the Program Operations Division, Foreign Agricultural Service, USDA. For current periods, reports prepared in field offices are obtained from the Procurement and Sales Division, ASCS.

Title III, P.L. 480, Barter: Quantities and values are obtained from the Office of Barter and Stockpiling, Foreign Agricultural Service, USDA. Since January 1965, data have been based on evidence of exportation (Form FAS-176, Export Certification, accompanied by copy of bill of lading) furnished to CCC in Washington. Prior to this time, when bills of lading on barter shipments were furnished to ASCS Commodity Offices but were not available in Washington, program export figures were based on lifting or invoice dates.

Title IV, Long-term dollar credit sales: Quantities and values are obtained from the Program Operations Division, Foreign Agricultural Service, USDA. Market values are estimated from quantities reported shipped. These estimated values are later revised to show actual values.

Sales for foreign currency, exports under development loans, and economic aid under Agency for International Development (AID) programs: Quantities and values are obtained from the Financial Review Division, Office of Controller, and Statistics and Reports Division, Office of Program and Policy Coordination, Agency for International Development. Data are on the basis of disbursements for exports (U.S. sources only) during the period covered. The data thus

obtained differ from actual export statistics in the following respects: They include exports during prior periods for which disbursements are made in the reporting period, as well as adjustments for shipments previously reported. They exclude exports during the reporting period for which disbursements had not yet been made.

Total agricultural exports under specified Government-financed programs: Sum of the above-described programs.

Total agricultural exports outside specified Government-financed programs: Difference between total exports under Government programs and total agricultural exports. This difference indicates commercial sales for dollars and includes unassisted commercial transactions and shipments of some commodities with governmental assistance in the form of (1) extension of credit, (2) sales of Government-owned commodities at less than domestic market prices, and (3) export payments in cash or in kind.

Exports under credits and guarantees extended by the Export-Import Bank and credit sales by the Commodity Credit Corporation are not included under specified Government-financed programs. These credits are for relatively short periods, repayable in dollars with interest, and result in no net cost to the Government. These credit programs are reported separately.

Export-Import Bank loans and guarantees: Values shown are disbursements reported by the Export-Import Bank. They include disbursements by the Bank and by U.S. commercial banks participating in Export-Import Bank loans at their own or at the Bank's risk or under Export-Import Bank guarantees against political and/or financial risk.

CCC credit sales: Values of commodities purchased under approved credits are furnished by the Office of the General Sales Manager, Foreign Agricultural Service, USDA.

Certain price supported commodities cannot compete in foreign markets without some form of compensation to the exporter who purchases at the higher domestic market price and sells in foreign markets at a lower world price. This compensation during 1955-66 was in the form of export payments in cash or in kind or sales from CCC inventory (or tobacco under loan to CCC) at competitive world prices. Minimum resort to export payments has been a guiding principle in the design of U.S. price-support programs for several years.

Estimates have been made of the portion of commercial sales for dollars which received export payment assistance, as well as of the unassisted portion, for fiscal years 1955-66.

Total agricultural exports: Total exports of U.S. farm products are reported by the Bureau of the Census, U.S. Department of Commerce, and compiled in the Trade Statistics and Analysis Branch, Foreign Development and Trade Division, Economic Research Service. Commodity detail on the Census classifications, "Donated for relief or charity by individuals or private agencies" is included with the respective commodities.
